

# **Resolution on the Revision of Student Course Evaluations**

## **Morehead State University Faculty Senate**

**October 8, 2020**

Whereas: The current student course evaluations are biased and provide little to no valuable feedback on a faculty's teaching efficacy, and

Whereas: Evaluation of instructor teaching efficacy is unequally and inappropriately applied across campus, and

Whereas: The existing system of peer and chair evaluation is not possible due to current staffing and workload levels, therefore,

Be it resolved: Morehead State University should investigate alternative strategies for evaluating instructor teaching efficacy that are not student evaluation based.
